## SUMMARY

I have been working in web development since 2019, the period during which I have worked in different environments, from small projects to start-ups. I am a self-motivated and self-taught professional who likes to solve problems.

I merge a passion for usability and user experience with technical knowledge to create user friendly digital experiences. My repertoire includes programming languages and tools such as ReactJS, Wordpress, CSS, Bootstrap, jQuery, and more.

## EXPERIENCE

URL

Worked on a project developing a face recognition app. The main goal was to build a backend with nodeJS, expressJS, and a database with MongoDB, that will extract data from pictures in the front end, and then send them to the back end to analyze and output the info of the specific picture.

- We used React, the JavaScript library for building user interfaces
- We used react-redux for state management
- Also used Redux Thunk as a middleware for communicating asynchronously with the external API.
- Tools: React, Redux, Redux-thunk, React Hooks, Github, Heroku, MongoDB, ExpressJS, nodeJS.
